Fast Carbs, Slow Carbs

The Simple Truth About Food, Weight, and Disease *HarperCollins*

The American body is in trouble. Unprecedented numbers of us suffer from obesity, heart disease, diabetes, and other debilitating illnesses. The root cause is a once-revolutionary idea that seemed to offer so much promise, but instead has become the cause of a global health crisis: processed foods. Over the past seventy-five years, a number of factors aligned to create a reality in which processed carbohydrates became our main food source. In *Fast Carbs, Slow Carbs*, bestselling author and former FDA Commissioner David A. Kessler explains how the quest to feed a nation resulted in a population that is

increasingly suffering from obesity and chronic disease and offers a solution for changing course. For decades, no one questioned the effects of these processed carbohydrates. The focus was on fertile grassland, ideal for growing vast amounts of wheat and corn; an industrial infrastructure perfect for refining those grains into starch; a food production behemoth that turns refined grains into affordable, appealing, and ever-present food items, from pizza to burritos to bagels; and an efficient distribution network that ensures consumption by Americans nationwide. But during those same decades, our bodies quietly contended with the metabolic chaos caused by consuming rapidly absorbable starch. Slowly but surely, these effects accumulated and

became disastrous, leading to the public health crisis in which we find ourselves today. In *Fast Carbs, Slow Carbs*, Kessler explains how eating refined grains such as wheat, corn, and rice leads to a cascade of hormonal and metabolic issues that make it very easy to gain weight and nearly impossible to lose it. Worse still is how excess weight creates a very real link to diabetes, heart disease, cognitive decline, and a host of cancers. We can no longer afford to dismiss the consequences of eating food that is designed to be rapidly absorbed as sugar in our bodies. Informed by cutting-edge research as well as Dr. Kessler's own personal quest to manage his weight, *Fast Carbs, Slow Carbs* reveals in illuminating detail how we got to this critical turning point in our health

as a nation—and outlines a plan for eliminating heart disease, allowing us to, finally, regain control of our health.

Low-Carb Express *Penguin Random House South Africa*

We would all love to eat less carbohydrates and switch to a low-carb diet, but many of us think we just do not have the time. We believe that low-carb

cooking and baking are time consuming, because you have to start from scratch, and it involves specialised ingredients which may be expensive or hard to find. Not so, says Vickie de Beer, who believes the problem lies in the fact that we have become afraid of the kitchen and lost the knowhow of basic cooking techniques. The truth is that you can still cook nutritional and flavourful meals without refined carbohydrates even when you are pressed for time. In Low-Carb Express, Vickie shows that with a little planning and better time management, you can cook healthy meals in a cinch that will not only benefit you and your family's overall health, but might also benefit your budget.

Award-winning journalist Gary Nunn investigates psychics, mediums and astrologers to understand their uncanny power – and whether it's used for good or evil. Gary has always been a sceptic. questions become professional. Why do such large swathes of the population want their fortunes told? Why this need to believe? What is he missing? So begins a two-year investigation into the mysterious, unregulated world of psychics. Gary tries some out himself, sometimes with hilarious results. He hears about their involvement in the media, the corporate world, government, the criminal justice system and beyond. As we wade further into the post-truth era, Gary unearths the unprecedented power of psychics today. Discover the world's most spookily accurate psychics and mediums, with stories so incredible even the sceptics cannot fully explain them.
