[DOC] Theorizing International Organizations An Organizational

This chapter outlines a broad history of the development of thinking about the law of international organizations, with a focus on the legal theory of functionalism, as well as a discussion on the latter's considerable strengths and weaknesses. Functionalism holds that states create international organizations to do things they are unable or reluctant to do on their own, yet consider inherently useful: organize postal relations, control the uses of atomic energy, regulate global health, etc.

Theorizing International Organizations - Oxford Handbooks

Most students of international organizations accept the proposition that, in one way or another, international organizations can be studied in terms of principal/agent theory, albeit perhaps with a few twists: the principal is by definition collective and usually represented with the agent in the form of a plenary organ. ² Most also accept the proposition that international organizations do not so much represent an abdication of sovereignty but may actually be of assistance in furthering ...
