It's a Continent

Unravelling Africa's History One Country at a Time *Coronet*

Why is Africa still perceived as a country when there are around 2,000 languages spoken on the continent alone? IT'S A CONTINENT aims to counter the misconception that Africa is a country by breaking down this vast, beautiful and complex continent into regions and countries. Each of the 54 African countries has a unique history and culture, and this book highlights the key historical moments that have shaped each nation and contributed to its global position, as well as within the African continent. Each chapter (focusing on a different country) of the book brings to light stories and African figures that have been marginalised in mainstream education, in a humorous and easily-digestible format, breaking down facts and events that you wouldn't believe happened. Why is the Liberian flag so similar to the Stars and Stripes of the United States? Have you heard about Thomas Sankara's quest for Burkina Faso's self-sufficiency? African soldiers' contribution to World War II? There are many aspects of history that mainstream education doesn't address, and this book allows the reader to understand the consequences of historical colonial activities within the African Continent, and how many African countries continue to re-build. The majority of countries within the continent are young, not just in population but in age, as many only gained independence in the 20th Century. IT'S A CONTINENT is the bold and brilliant book for readers who want to gain an understanding of things you were never taught in school.

Africa Is Not a Country: Notes on a Bright Continent *W. W. Norton*

An exuberant and stereotype-busting portrait of contemporary Africa in all its splendid diversity, by one of its leading new writers.

A United States of Africa?

A substantial work on the question of unity of African states, containing essays from twenty-four scholars from universities throughout Africa. The papers revolve around four main subjects. The first examines the colonial origins of the African state, neo-colonial constraints on post-colonial regimes, and the nature of the post-colonial political elite. The second subject under discussion is regional integration as a vehicle for the realisation of the African Union. Dani Wadaba Nabudere contributes an overview chapter on African unity in historical perspective; and many contributors consider the complicating phenomenon of globalisation alongside regional integration. The next part examines the extent to which problems of peace and security impact upon the integration project; and the effectiveness of existing regional and continental conflict prevention and resolution mechanisms. Xavier Renou analyses the present roles of France and America on the continent as an obstacle to peace and unity in a chapter entitled 'The New Franco-American Cold-War'. Finally, three contributors address the need for an approach to African unity for development better grounded in civil society and to a lesser extent centred around the role of the state.

Marketing Brands in Africa

Perspectives on the Evolution of Branding in an Emerging Market *Springer Nature*

This contributed volume serves as an authoritative reference and guide for anyone looking to study or build a brand in Africa. Despite being touted as the 'last frontier' of global brands, very little research exists that examines brands and branding in this emerging market. Authors cover crucial topics such as the history of branding in Africa, branding approaches used by start-ups, religious organizations, political parties, and businesses in the informal economies of Africa, as well as marketing Africa as a brand using practical cases, empirical and critical approaches. With the world’s youngest population and the second-fastest growing economies, Africa has quickly become a hotbed for marketing and consumption of local and global brands. While past research has mostly focused on examining the brand image of Africa and African countries, or on branding Africa as a place for tourist consumption, what is missing is a comprehensive guide that discusses the theory and practice of branding and brands in and from Africa. Through theoretical and practical contributions, the authors of this book seek to fill the knowledge gap about branding in and from Africa.

Seeking the Bomb

Strategies of Nuclear Proliferation *Princeton University Press*

The first systematic look at the different strategies that states employ in their pursuit of nuclear weapons Much of the work on nuclear proliferation has focused on why states pursue nuclear weapons. The question of how states pursue nuclear weapons has received little attention. Seeking the Bomb is the first book to analyze this topic by examining which strategies of nuclear proliferation are available to aspirants, why aspirants select one strategy over another, and how this matters to international politics. Looking at a wide range of nations, from India and Japan to the Soviet Union and North Korea to Iraq and Iran, Vipin Narang develops an original typology of proliferation strategies—hedging, sprinting, sheltered pursuit, and hiding. Each strategy of proliferation provides different opportunities for the development of nuclear weapons, while at the same time presenting distinct vulnerabilities that can be exploited to prevent states from doing so. Narang delves into the crucial implications these strategies have for nuclear

proliferation and international security. Hiders, for example, are especially disruptive since either they successfully attain nuclear weapons, irrevocably altering the global power structure, or they are discovered, potentially triggering serious crises or war, as external powers try to halt or reverse a previously clandestine nuclear weapons program. As the international community confronts the next generation of potential nuclear proliferators, Seeking the Bomb explores how global conflict and stability are shaped by the ruthlessly pragmatic ways states choose strategies of proliferation.

Rude Citizenship

Jamaican Popular Music, Copyright, and the Reverberations of Colonial Power *UNC Press Books*

In this deep dive into the Jamaican music world filled with the voices of creators, producers, and consumers, Larisa Kingston Mann—DJ, media law expert, and ethnographer—identifies how a culture of collaboration lies at the heart of Jamaican creative practices and legal personhood. In street dances, recording sessions, and global genres such as the riddim, notions of originality include reliance on shared knowledge and authorship as an interactive practice. In this context, musicians, music producers, and audiences are often resistant to conventional copyright practices. And this resistance, Mann shows, goes beyond cultural concerns. Because many working-class and poor people are cut off from the full benefits of citizenship on the basis of race, class, and geography, Jamaican music spaces are an important site of social commentary and political action in the face of the state's limited reach and neglect of social services and infrastructure. Music makers organize performance and commerce in ways that defy, though not without danger, state ordinances and intellectual property law and provide poor Jamaicans avenues for self-expression and self-definition that are closed off to them in the wider society. In a world shaped by coloniality, how creators relate to copyright reveals how people will play outside, within, and through the limits of their marginalization.

The Unfortunates

Sahara is close to giving up, herself: her depression is, as she says, her only “Life Partner.” And this narrative—taking the form of an irreverent, piercing “thesis” to the university committee that will judge her—is meant to be a final unfurling of her singular, unforgettable voice before her own inevitable disappearance and death. But over the course of this wild sophomore year, and supported by her eccentric community of BIPOC women, Sahara will eventually find hope, answers, and an unexpected redemption.

Coping with Water Scarcity

An Action Framework for Agriculture and Food Security *Food & Agriculture Org*

"In the 20th Century, water use has increased at more than twice the rate of population growth, to the point that in many regions overall demand for water can no longer be satisfied. Agriculture uses 70 percent of global freshwater withdrawals and is probably the sector where water scarcity is most critical. Under the joint pressure of population growth and changes in dietary habits, food consumption is increasing in most regions of the world, and it is expected that by 2050 an additional 60 percent of food will be needed to satisfy global demand. Future policy decisions will increasingly need to reflect the tight linkage between water and food security, and be based on a clear understanding of opportunities and trade-offs in managing water for agricultural production. In order to guide its action in support of its member countries, FAO has recently embarked on a long-term programme on the theme "Coping with water scarcity -- the role of agriculture". Based on an expert consultation, a conceptual framework has been developed to help address the question of food security under conditions of water scarcity. This report presents the conceptual framework, reviews a series of policy and technical options, and establishes a set of principles that should serve as a basis for the development of effective food security policies in response to growing water scarcity."--Back cover.

Understanding Russian Strategic Behavior

Imperial Strategic Culture and Putin’s Operational Code *Routledge*

This book examines the extent to which Russia’s strategic behavior is the product of its imperial strategic culture and Putin’s own operational code. The work argues that, by conflating personalistic regime survival with national security, Putin ensures that contemporary Russian national interest, as expressed through strategic behavior, is the synthesis of a peculiar troika: a long-standing imperial strategic culture, rooted in a partially imagined past; the operational code of a counter-intelligence president and decision-making elite; and the realities of Russia as a hybrid state. The book first examines the role of structure and agency in shaping contemporary Russian strategic behavior. It then provides a conceptual understanding of strategic culture, and applies this to Tsarist and Soviet historical developments. The book’s analysis of the operational code, however, demonstrates that Putinism is more than the sum of the past. At the end, the book assesses Putin’s statecraft and stress-tests our assumptions about the exercise of contemporary power in Russia and the structure of Putin’s agency. This book will be of interest to students of Russian politics and foreign policy, strategic studies and international relations.

Rebels Against the Raj

Western Fighters for India's Freedom *Knopf*

An extraordinary history of resistance and the fight for Indian independence—the little-known story of seven foreigners to India who joined the movement fighting for freedom from British colonial rule. Rebels Against the Raj tells the story of seven people who chose to struggle for a country other than their own: foreigners to India who across the late 19th to late 20th century arrived to join the freedom movement fighting for independence from British colonial rule. Of the seven, four were British, two American, and one Irish. Four men, three women. Before and after being jailed or deported they did remarkable and pioneering work in a variety of fields: journalism, social reform, education, the emancipation of women, environmentalism. This book tells their stories, each renegade motivated by idealism and genuine sacrifice; each connected to Gandhi, though some as acolytes where others found endless infuriation in his views; each understanding they would likely face prison sentences for their resistance, and likely live and die in India; each one leaving a profound impact on the region in which they worked, their legacies continuing through the institutions they founded and the generations and individuals they inspired. Through these entwined lives, wonderfully told by one of the world’s finest historians, we reach deep insights into relations between India and the West, and India’s story as a country searching for its identity and liberty beyond British colonial rule.

Emotional

The New Thinking About Feelings *Penguin UK*

'Both a brilliant scholar and a great writer, Leonard Mlodinow guides us through the fascinating science of what we feel, and why - and what we can do about it. I learned a lot from this wonderful book: a masterpiece of clarity, helpfulness, and heart' Rick Hanson We've been told we need to master our emotions and think rationally to succeed. But cutting-edge science shows that feelings are every bit as important to our success as thinking. You make hundreds of decisions every day, from what to eat for breakfast to how to influence people, and not one of them could be made without the essential component of emotion. It has long been held that thinking and feeling are separate and opposing forces in our behaviour. But as best-selling author Leonard Mlodinow tells us, extraordinary advances in psychology and neuroscience have proven that emotions are as critical to our well-being as thinking. How can you connect better with others? How can you improve your relationship to frustration, fear, and anxiety? What can you do to live a happier life? The answers lie in understanding emotions. Taking us on a journey from the labs of pioneering scientists to real-world scenarios that have flirted with disaster, Mlodinow shows us how our emotions help, why they sometimes hurt, and what we can make of the difference. Cutting-edge research and deep insights into our evolution, biology, and neuroscience promise to help us understand our emotions better and maximize their benefits. Told with characteristic clarity and fascinating stories, Mlodinow's exploration of the new science of feelings is an essential guide to making the most of one of nature's greatest gifts to us.

The Quiet Before

On the Unexpected Origins of Radical Ideas *Crown*

An “elegantly argued and exuberantly narrated” (The New York Times Book Review) look at the building of social movements—from the 1600s to the present—and how current technology is undermining them “A bravura work of scholarship and reporting, featuring amazing individuals and dramatic events from seventeenth-century France to Rome, Moscow, Cairo, and contemporary Minneapolis.”—Louis Menand, author of The Free World We tend to think of revolutions as loud: frustrations and demands shouted in the streets. But the ideas fueling them have traditionally been conceived in much quieter spaces, in the small, secluded corners where a vanguard can whisper among themselves, imagine alternate realities, and deliberate about how to achieve their goals. This extraordinary book is a search for those spaces, over centuries and across continents, and a warning that—in a world dominated by social media—they might soon go extinct. Gal Beckerman, an editor at The New York Times Book Review, takes us back to the seventeenth century, to the correspondence that jump-started the scientific revolution, and then forward through time to examine engines of social change: the petitions that secured the right to vote in 1830s Britain, the zines that gave voice to women’s rage in the early 1990s, and even the messaging apps used by epidemiologists fighting the pandemic in the shadow of an inept administration. In each case, Beckerman shows that our most defining social movements—from decolonization to feminism—were formed in quiet, closed networks that allowed a small group to incubate their ideas before broadcasting them widely. But Facebook and Twitter are replacing these productive, private spaces, to the detriment of activists around the world. Why did the Arab Spring fall apart? Why did Occupy Wall Street never gain traction? Has Black Lives Matter lived up to its full potential? Beckerman reveals what this new social media ecosystem lacks—everything from patience to focus—and offers a recipe for growing radical ideas again. Lyrical and profound, The Quiet Before looks to the past to help us imagine a different future.

Why you should give a f*ck about farming

Because you eat *Random House Australia*

There is no farmers and others. If you eat or wear clothes, the decisions you make influence farming. ‘Eaters will be the ultimate arbiter of where and how food is grown and how the land is cared for ... We all have a stake in the future of food and farming. I am going to show you why.’ Farming sits at the intersection of the world’s biggest challenges around climate change, soil, water, energy, natural disasters and zoonotic diseases. Yet Australia has no national food policy. No national agriculture strategy. Our water policy is close to the Hunger Games. People with means can shop at farmers’ markets and order brunch, by the provenance of their eggs, bacon, butter, tomatoes and greens. But do they really understand the trade-offs required to grow it? In this book Gabrielle Chan examines the past, present and future of farming with her characteristically forensic eye. She lays out how our nation, its leaders, farmers and eaters can usher in new ways for us to work and live on our unique and precious land. We must forge a new social contract if we are to grow healthy food on a thriving landscape, while mitigating climate and biodiversity loss. This important book will change your thinking about food, farming and how you eat.

Toxic

The Rotting Underbelly of the Tasmanian Salmon Industry *Penguin Group Australia*

In a triumph of marketing, the Tasmanian salmon industry has for decades succeeded in presenting itself as world’s best practice and its product as healthy and clean, grown in environmentally pristine conditions. What could be more appealing than the idea of Atlantic salmon sustainably harvested in some of the world’s purest waters? But what are we eating when we eat Tasmanian salmon? Richard Flanagan’s exposé of the salmon farming industry in Tasmania is chilling. In the way that Rachel Carson took on the pesticide industry in her ground-breaking book Silent Spring, Flanagan tears open an industry that is as secretive as its practices are destructive and its product disturbing. From the burning forests of the Amazon to the petrochemicals you aren't told about to the endangered species being pushed to extinction you don't know about; from synthetically pink-dyed flesh to seal bombs . . . If you care about what you eat, if you care about the environment, this is a book you need to read. Toxic is set to become a landmark book of the twenty-first century.

You're Not a Country, Africa *Penguin Random House South Africa*

In this wide-ranging collection of essays, Pius Adesanmi explores what Africa means to him as an African and as a citizen of the world. Examining the personal and the political, tradition and modernity, custom and culture, Adesanmi grapples with the complexity and contradictions of this vast continent, zooming in most closely on Nigeria, the country of his birth. The inspiration for the title of the collection, You're Not a Country, Africa, comes from a line of poetry: 'You are not a country Africa, you are a concept, fashioned in our minds, each to each'. The Africa fashioned in our minds - with our fears and our dreams - is the Africa that the reader will encounter in these essays. Through narratives and political and cultural reflections, Pius Adesanmi approaches the meaning of Africa from the perspective that you never actually define Africa: rather, it defines you in various contexts and for various people.

Our Ghosts Were Once People

Stories on Death and Dying *Jonathan Ball Publishers*

‘I would get out of the car at every shopping centre and want to ask the stranger walking by with their trolley: “Why are you still shopping? Someone I love has died.”’ – Dela Gwala Death is a fact of life, but the experience of grief is unique to each of us. This timely collection brings together a range of voices to offer reflections on death and dying, from individual losses to large scale catastrophes. Karin Schimke revisits her troubled relationship with her late father, a Second World War survivor ‘whose brain had been broken by violence’. Madeleine Fullard, the head of South Africa’s Missing Persons Task Team, draws us into the search for activists who were ‘disappeared’ or went missing in political circumstances between 1960 and 1994. Caine Prize winner Lidudumalingani remembers his childhood in a small village in the Eastern Cape, and how his mother always listened to death notices read over the radio as a way of bearing witness to the grief of strangers. The other contributors in this poignant and thought-provoking anthology turn their minds to subjects as varied as the ritual of washing the body of the deceased before burial, the ethics of killing small animals, and the extinction of humankind. In a time of relentless grief, Our Ghosts Were Once People reminds us that one of the small consolations of literature is that all sorrows can be borne. Making Australian History *Random House Australia*

A few years ago Anna Clark saw a series of paintings on a sandstone cliff face in the Northern Territory. There were characteristic crosshatched images of fat barramundi and turtles, as well as sprayed handprints and several human figures with spears. Next to them was a long gun, painted with white ochre, an unmistakable image of the colonisers. Was this an Indigenous rendering of contact? A work of history? Each piece of history has a message and context that depends on who wrote it and when. Australian history has swirled and contorted over the years: the history wars have embroiled historians, politicians and public commentators alike, while debates over historical fiction have been as divisive. History isn’t just about understanding what happened and why. It also reflects the persuasions, politics and prejudices of its authors. Each iteration of Australia’s national story reveals not only the past in question, but also the guiding concerns and perceptions of each generation of history makers. Making Australian History is bold and inclusive: it catalogues and contextualises changing readings of the past, it examines the increasingly problematic role of historians as national storytellers, and it incorporates the stories of people.
