 adding links in the chain that runs thru
 the middle of the cutterbar spring. Lift-
 raise the cutterbar up to take the tension
 off the spring and then add links. Did you
 have to move the pulley to get the old

The 350 mower was originally designed and equipped with a spring. I would recommend that you replace the spring to help get your mower operating correctly. This helps the 'float' of the inner shoe once you get the height adjusted for your frame. Check with your local Deere dealership to price the spring and also price an operator's manual.
