Manual Air Conditioning

Manual and automatic air conditioners are used to cool homes, businesses and vehicles. Manual and automatic systems primarily cool one room or zone in a home or building, or for a small space, such as a vehicle. These units do not require a "whole home" HVAC duct work system to operate. Only central air conditioning systems require duct work.

What Is Air Conditioning? The Home AC System Explained

A manual air conditioning system consists of several elements: compressor, pipes, freon radiator, condenser, and filtration unit. But the operating principle is relatively simple, as I explained in the article on air conditioning. It is worth remembering that in the case of a manually controlled air conditioning installation, ie the famous 3-wheel panel and a small button on which the snowflake is drawn, the cold air in the passenger compartment comes after it is pulled from the outside and ...
