MRCS Part B OSCE Clinical and Procedural Skills ...

clinical and procedural skills components of the MRCS Part B exam. In the Intercollegiate MRCS OSCE Examination, the 'Clinical and Procedural Skills' component makes up approximately 15-20% of the total mark. This element of the exam tests the candidate's capability to apply basic science and clinical knowledge in a practical context.

Doctors Academy

Description. In the Intercollegiate MRCS OSCE Exam, the ‘Clinical and Procedural Skills’ component, making up about 15-20% of the total marks, will test the candidate’s capacity to apply sound basic science/clinical knowledge in a practical context. The candidate’s ability to perform practical tasks related to surgery that requires manual dexterity, hand-eye coordination and visual/spatial awareness will be assessed.

Cardiff MRCS OSCE course: Clinical and Procedural Skills ...

Part B of the intercollegiate MRCS is an objective structured clinical exam (OSCE). It tests anatomy and surgical pathology, applied surgical science and critical care, clinical, procedural and communication skills.

Intercollegiate MRCS Part B OSCE — Royal College of Surgeons

The clinical and procedural skills may make up to about 15-20% of the overall marks in the exam. Each chapter in this book is laid out in a format similar to a station as tested in the exam. It provides a clinical scenario/setting, important things not to miss, talk through, equipment required, one accepted way to perform the procedure and a sample mark scheme.
