This fictional running case study helps students see how theory translates into practice in a familiar setting. For example, what kind of leadership styles do the new management team use? Are personality tests any use for hiring new staff for the gym? How do the staff on the receiving end of various management techniques feel and react? Follow the management dilemmas faced, and the techniques employed with varying rates of success, by a wide range of characters. The running case is interwoven throughout the book, encouraging students to make links between the different topic areas and gain a holistic view of organizational behaviour. The book covers all the core topics found on undergraduate modules, while also going a step further to consider alternative approaches and compare them with mainstream theories. Students are encouraged to develop a critical mindset and think about the context of the theories they come across and the values embedded within them. A wealth of real-life case studies, including those drawn from the public and not-for-profit sectors, bring the subject to life. Innovative on-page learning features link study and employability skills to the topics being discussed so students can apply theories from the book directly to their own lives and future careers. Interviews with students, employees and business leaders are included online, and show just how relevant organizational behaviour is to people's everyday lives. The real-life examples in the second edition have been augmented with new international and European examples in every chapter, and the book's Online Resource Centre now features seminar and group activities and a lecturer guide to help lecturers make full and effective use of the book and online material in their teaching. A unique, lively package makes this core reading for all business students taking an introductory module in organizational behaviour.
