**Explanation Of The
 Poem Cheetah**
 READ THIS. A cheetah
 is innocently lolling in
 the long grass. All
 around are buck,
 apparently unaware of
 its presence. Then, as
 hunger takes hold, the

cheetah looks for its prey. Immediately the buck break into a stampede and the cheetah gives chase. A NOTE ON THE POET. Information on Charles Eglington is very sketchy indeed. We know that he was born in Johannesburg and worked there as a journalist and a magazine editor.

Charles Eglington - "Cheetah" -

Knowledge4Africa

This poem shows the game of chance involved when a predator attacks his prey. The Cheetah looks harmless and awkward like a puppy. He relaxes in the shade but gradually focuses in on scattered herds that have no idea that he will attack them. Gradually, hunger tightens his muscles

and he slides along the plain ready to hunt.

English First Additional Language

Cheetah: The cheetah is the fastest land animal. It can reach speeds of 75 mph (120km/h). Although cheetahs are great sprinters, they can not sustain their speed over long distances. Cheetahs are the only existing feline that do not possess retractable claws. Cheetahs are an endangered species, with most living in Africa, although there is also a small population in Iran.

Poem Cheetah - solid.braziljs.org

The faster the cheetah flies, The faster his poor prey dies. The hungrier the cheetah gets, The longer his prey frets. He happens to be real smart, He always plays a part, In keeping the population down, He sometimes eats something brown. He sometimes does not catch his food, 'cause his prey is really rude. The lions and leopards growl,

Analysis Of The Poem Cheetah

Today's modern cheetahs can run 60 mph to catch prey. Their ancestors could originally only run 20 mph. There was selective pressure in the environment of cheetahs that demanded for faster cheetahs to catch more prey because there was a battle for survival. There was variation in the ancestral population. Some cheetahs could run faster...
