CPRI Front-Haul Technology - CableFree

A low latency compression scheme of LTE downlink baseband signal based on clustering algorithm is presented in this paper to reduce the CPRI transmission bandwidth in C-RAN. The main procedure of algorithm is removing redundant bandwidth

VQ data in frequency domain, clustering and quantifying the points on the constellation, and finally selecting an appropriate coding scheme adaptively.

A compression scheme for LTE baseband signal in C-RAN ...

This post underlines the LTE CPRI compression. Let's have a look together below to find more information on the topic. User-plane data consumes a large amount of CPRI bandwidth resources in each cell. To support more carriers or RRUs/RFUs/pRRUs on a CPRI port, the CPRI Compression feature is introduced.

LTE CPRI compression - Huawei Enterprise

Support Community

The maximum use case in LTE-A is 8x8 MIMO and 5x 20 MHz LTE carriers requires a CPRI line rate of 40.5 Gbps (64/66B encoding) without compression. A 3:1 compression can reduce the required line rate to 13.5 Gbps which is achievable today at moderate cost. CPRI compression techniques will be required to implement maximum LTE-A

The Emerging Need for Fronthaul Compression

Compression is used to compress data in wireless systems on the link between the Remote Radio Unit (RRU) and the Baseband Card (wired over CPRI or CPRI over wireless front haul). IDT is the first

company to offer commercial IP that supports GSM, WCDMA, and LTE signals at full CPRI data rates, keeping high signal quality at compression rates up to 3:1.

IQ Data Compression IP | Renesas

The CPRI Specification version 4. 1 (in addition to 1.4, 2.1, 3.0, 4.0) is now available for download on the Specification section of this homepage. The new 4. 1 release extends the specification to encompass higher line-rates for LTE (Long Term Evolution).

Common Public Radio Interface

The CPRI (Common Public Radio Interface) is a popular standard to transport baseband

I/Q signals to the radio unit in Base Station. It allows efficient as well as flexible I/Q data interface for various wireless standards such as GSM, WCDMA, LTE etc.

CPRI Line Rates | Rate-1,2,3,4,5,6,7A, 7,8,9,10 of CPRI Line

The width of the word depends on the CPRI line rate. For example, in an LTE system, if $I = 16$ bits and $Q = 16$ bits, then one Antenna carrier is 32 bits. Each 256 basic frames make up a hyperframe and 150 hyperframes are needed to transport an LTE 10 ms frame.

What is CPRI & eCPRI ? -

Techltheworld

For example, to transport a 10 MHz LTE waveform to a single antenna, CPRI requires

460.8 MBPS (excluding protocol overhead). Consequently, CPRI will require 1.843 GBPS per four-antenna multiple-input multiple-output (MIMO) cell, i.e., sector. In this study we propose baseband signal compression schemes (i.e., I/Q compression) that lower the required transport data rates.
