Letrozole versus Clomiphene for Infertility in the ...

The subgroup of 2.5 mg letrozole displayed a statistically significant higher rate of clinical pregnancy as compared with 100 mg of clomiphene. The results of this study conclude that letrozole is as effective as clomiphene in women with unexplained infertility. Letrozole at a dose of 2.5 mg seems more effective. Further high-quality studies assessing the possible effectiveness of letrozole in selected groups of patients are

warranted.

Letrozole versus clomiphene citrate for unexplained ...

Recently, results of a high-quality randomized clinical trial published by Legro and colleagues in the New England Journal of Medicine indicate that letrozole is more effective than clomiphene for the treatment of anovulatory infertility in women with PCOS. 1 Of great importance, letrozole was documented to be especially effective in women with a BMI greater than 30.3 kg/m 2.

Letrozole versus clomiphene for ovulation induction ...

In contrast, other research has shown no superiority of letrozole over clomiphene citrate for inducing ovulation prior to intrauterine insemination in women with unexplained infertility.⁹This could be related to other factors, such as differences in the study populations, drug doses, or intrauterine insemination technique, or to the fact that the study groups showed no significant difference in endometrial thickness at the time of human chorionic gonadotrophin administration.

Letrozole versus Clomiphene Citrate for Induction of ...

METHODS. We enrolled couples with unexplained infertility in a multicenter, randomized trial. Ovulatory women 18 to 40 years of age with at least one patent fallopian tube were randomly assigned to ovarian stimulation (up to four cycles) with gonadotropin (301 women), clomiphene (300), or letrozole (299).
