...

A Passivhaus has a continuous well insulated thermal envelope that keeps the building warm during the winter months and keeps the heat out during the summer months. Airtightness. The Passivhaus has a continuous airtight barrier that protects the building from air leakage, heat losses and improves overall

thermal comfort. Ventilation Strategy

Passivhaus Detailing and Design: A Complete Guide for ...

What is a Passivhaus? The Passivhaus standard, developed in Germany, is a low energy design standard. It was developed in 1990, over 25 years ago and some estimates suggest there are well over 50,000 Passivhaus buildings around the world.

What is a Passivhaus? Important Key Principles Explained

The book contains 130 Passivhaus construction details, with assembly cross-sections and junction details. The details are beautifully illustrated to scale in four colours throughout. “ Details for Passive Houses: A Catalogue of Ecologically Rated Constructions ” is an excellent reference for successful Passivhaus construction detailing.

Successful Passivhaus Construction Detailing | PASSIVHAUS ...

This may in fact be one of the major criticisms of Passivhaus — it’s not readily adaptable. Even things like running a cable through for a satellite dish is frowned upon. Of course, you can do what you want to your Passivhaus but it will cease to be a Passivhaus if you mess with it or sleep with the windows open.

Passivhaus: What is it? | Homebuilding

The Passivhaus Planning Package (PHPP) and certification process requires the quantified input of all significant thermal bridges. Where standard Passivhaus details are used a number of reference sources are available for psi value determination. The

use of bespoke construction details will necessitate accurate modelling of individual

Passivhaus primer: Designer’s guide A guide for the design ...

The core focus of Passivhaus is to dramatically reduce the requirement for space heating and cooling, whilst also creating excellent indoor comfort levels. This is primarily achieved by adopting a fabric first approach to the design by specifying high levels of insulation to the thermal envelope with exceptional levels of airtightness and the use of whole house mechanical ventilation.

Passivh User Planung Konstruktion Details Beispiele

An architect who has already planned and built a certified Passive House indisputably possesses the necessary know-how. The certificate shows the building owner that the designer or consultant has acquired the knowledge and experience relevant for planning or consultancy services for Passive House projects.

Passivhaus Institut

The designPH plugin has been developed by the Passive House

Institute to provide a 3D model interface for entering building geometry into PHPP. The benefits of the tool are two-fold; firstly it will simplify the process of entering data into PHPP and secondly it will provide preliminary feedback on the performance of the design within SketchUp.
