Grade 6: Air and Aerodynamics Jeopardy Template

The air must reach the end of the wing at the same time so the air going over the top of the wing has a longer distance to travel so it must travel faster. Bernoulli's Principle explains the shape of an airplane's wing. The bottom is flat, while the top is curved. Air travels across the top and bottom at the same time, so air travels slower on the bottom (creating more pressure) and faster on top (creating less pressure).
