Produced flow is typically complex, with oil, gas, and water traveling in many different multiphase flow patterns, from heavy oil to wet gas. That's why we developed Vx multiphase well testing technology, employing advanced full-gamma spectroscopy for single-point measurement—to accurately capture multiphase flow dynamics while enabling real-time data monitoring analysis.

A device for measuring in-situ the velocity of fluid flow in a well, usually one completed for production or injection. The most common device is the spinner flowmeter, but torque flowmeters and crosscorrelation flowmeters also are used. In the 1940s and 1950s, various other surface-metering techniques were tried, but spinner flowmeters emerged as the most suitable for measuring downhole ...

Diaphragm meters are the most common type of gas meter used in both residential and commercial applications. They are commonly referred to as positive displacement meters because the medium (in this case, natural gas), which is measured displaces components in the meter so that gas flow occurs. In this meter style, the diaphragms expand and contract, and this motion serves as a primary flow ...

NUFLO LT standard piping liquid turbine flowmeters indicate flow rate and measure total throughput of a liquid line. As liquid flows through the meter and over the rotor, the rotor turns at a speed that is directly proportional to the flow rate. A magnetic pickup senses the rotor blades as they pass and generates an electrical (sine wave) signal.
