A comprehensive report from the United States Environmental Protection Agency (EPA) proposes an approach of multiple methods (e.g., ecological methods, cost-based methods, willingness to pay methods, deliberative valuation) to help capture different dimensions of biodiversity and ecosystems services, as well as the perspectives of different stakeholders.

Economic Valuation - an overview | ScienceDirect Topics

The preventive expenditure method is a cost based valuation method that uses data on actual expenditures made to alleviate all environmental problems. Often, costs may be incurred to mitigate the damage caused by an adverse environmental impact. For example, if drinking water is polluted, extra purification may be needed.

Methods Used for the Environmental Valuation (With Diagram)

Nonmarket valuation, i.e., valuing environmental goods and services that are not traded in a market, has been increasingly used in a variety of policy and decision-making contexts.
