The homicidal attack is only the first in a series of events that sends the biochemist on the run, pursued by faceless enemies who want his studies terminated and Cousins dead. City at the End of Time *Del Rey*

Multiple Hugo and Nebula award-winning author, Greg Bear is one of science fiction's most accomplished writers. Bold scientific speculation, riveting plots, and a fierce humanism reflected in characters who dare to dream of better worlds distinguish his work. Now Bear has written a mind-bendingly epic novel that may well be his masterpiece. Do you dream of a city at the end of time? In a time like the present, in a world that may or may not be our own, three young people--Ginny, Jack, and Daniel--dream of

a doomed, decadent city of the distant future: the Kalpa. Ginny's and Jack's dreams overtake them without warning, leaving their bodies behind while carrying their consciousnesses forward, into the minds of two inhabitants of the Kalpa—a would-be warrior, Jebrassy, and an inquisitive explorer, Tiadba—who have been genetically retro-engineered to possess qualities of ancient humanity. As for Daniel: He dreams of an empty darkness—all that his future holds. But more than dreams link Ginny, Jack, and Daniel. They are fate-shifters, born with the ability to skip like stones across the surface of the fifth dimension, inhabiting alternate versions of themselves. And each guards an object whose origin and purpose are unknown: gnarled, stony artifacts called sum-runners that persist unchanged through all versions of time. Hunted by others with similar powers who seek the sum-runners on behalf of a terrifying, goddess-like entity known as the Chalk Princess, Ginny, Jack, and Daniel are drawn, despite themselves, into an all but hopeless mission to rescue the future—and complete the greatest achievement in human history.

Anvil of Stars *Open Road Media*

The “provocative and entertaining follow-up” to *The Forge of God*: Exiled from their planet, humans unite with one alien race in the fight against another (Publishers Weekly). The Ship of the Law travels the infinite enormity of space, carrying eighty-two young people: fighters, strategists, scientists—and children. After one alien culture destroyed their home, another offered the opportunity for revenge in the form of a starship built from fragments of the Earth's corpse, a ship they now use to scour the universe in search of their enemy. Working with sophisticated nonhuman technologies that need new thinking to comprehend them, they're cut off forever from the people they left behind. Denied information, they live within a complex system that is both obedient and beyond their control. They're frightened. And they're waging war against entities whose technologies are unimaginably advanced and vast, and whose psychology is ultimately, unknowably alien. In *Anvil of Stars*, the multimillion-selling, Nebula Award-winning author of *Eon* and other science fiction masterpieces “fashions an action-packed and often thrilling plot; by using each of the well-depicted alien races to mirror human behavior, he defines what it means to be *Homo sapiens*. . . . A gripping story” (Publishers Weekly).

The Forge of God *Open Road Media*

This doomsday masterpiece from the author of *Eon* and *Hull Zero Three* was a finalist for the Hugo and Nebula awards. On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it—a dying Guest who brings devastating news for Edward and for Planet Earth. As more unexplained phenomena spring up around the globe—a granite mountain appearing in Australia, sounds emanating from the earth's core, flashes of light among the asteroids—it becomes clear to some that the end is approaching, and there is nothing we can do. In *The Forge of God*, award-winning author Greg Bear describes the final days of the world on both a massive, scientific scale and in the everyday, emotional context of individual human lives. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth? Nominated for the Nebula, Hugo, and Locus Awards, *The Forge of God* is an engrossing read, breathtaking in its scope

and in its detail.

The Infinity Concerto *Open Road Media*

Music, myth, and magic mix in this tale of a melody not meant for human ears, from the New York Times–bestselling and award-winning author of *Darwin's Radio*. Michael Perrin is an aspiring poet, struggling to express the chaotic cadences of his thoughts on paper. He finds a kindred spirit in Arno Waltiri, the film score composer behind several of Michael's favorite classic movies. The maestro's greatest piece, however, was performed in front of a live audience only once. The concerto Opus 45, *Infinity* left its listeners entranced, altered to the very core of their souls. Waltiri's composition is a song of power. Never meant to be heard by human ears, its melody is as captivating as a siren's call, its notes ring out like a death knell, and its rhythms shake the very foundations of reality. The music's otherworldly tones have led Michael through the gate between Earth and the Realm of the Sidhedark, where faeries reign by rule of magic—and where Michael must find his muse if he's ever to return home. *The Infinity Concerto* is a fantasy masterpiece by the Hugo and Nebula Award-winning author of the *Forerunner Saga*, *Eon*, and other imaginative classics.

The Venging *Open Road Media*

Hailed by readers and critics alike, *The Venging* has been described as an “excellent collection” and its author praised as “one of the freshest writers to break into the science fiction field in many a year.” This is the first published collection of short stories by one of the foremost voices in science fiction today. This significant volume contains many characters and situations that later evolved into their own novels. “Mandala” features technologically perfect cities that eject their sinful human occupants, a premise that can be found at the root of Bear's later novel, *Strength of Stones*. In “Hardfought,” Bear brilliantly handles the classic science fiction dilemma of human communication with aliens. Other stories include “The Wind From a Burning Woman” in which a woman holds the world hostage by controlling a giant asteroid; “Scattershot,” in which the inhabitants of many universes meet in an undefined limbo space; and the Nebula Award finalist “Petra,” a story of a world where chaos rules, stone moves, and the mind controls reality.

Darwin's Children *Del Rey*

Greg Bear's Nebula Award-winning novel, *Darwin's Radio*, painted a chilling portrait of humankind on the threshold of a radical leap in evolution—one that would alter our species forever. Now Bear continues his provocative tale of the human race confronted by an uncertain future, where “survival of the fittest” takes on astonishing and controversial new dimensions. Eleven years have passed since SHEVA, an ancient retrovirus, was discovered in human DNA—a retrovirus that caused mutations in the human genome and heralded the arrival of a new wave of genetically enhanced humans. Now these changed children have reached adolescence . . . and face a world that is outraged about their very existence. For these special youths, possessed of remarkable, advanced traits that mark a major turning point in human development, are also ticking time bombs harboring hosts of viruses that could exterminate the “old” human race. Fear and hatred of the virus children have made them a persecuted underclass, quarantined by the government in special “schools,” targeted by federally sanctioned bounty hunters, and demonized by hysterical segments of the population. But pockets of resistance have sprung up among those opposed to treating the children like dangerous diseases—and who fear the worst if the government's draconian

measures are carried to their extreme. Scientists Kaye Lang and Mitch Rafelson are part of this small but determined minority. Once at the forefront of the discovery and study of the SHEVA outbreak, they now live as virtual exiles in the Virginia suburbs with their daughter, Stella—a bright, inquisitive virus child who is quickly maturing, straining to break free of the protective world her parents have built around her, and eager to seek out others of her kind. But for all their precautions, Kaye, Mitch, and Stella have not slipped below the government’s radar. The agencies fanatically devoted to segregating and controlling the new-breed children monitor their every move—watching and waiting for the opportunity to strike the next blow in their escalating war to preserve “humankind” at any cost.

Queen of Angels *Open Road Media*

Hugo Award Finalist: A near-future novel of artificial intelligence, human nature, and mass murder that “succeeds on virtually every level” (The New York Times Book Review). In Los Angeles in 2047, advances in the science of psychology have made crime a rare occurrence. So it’s utterly shocking when eight bodies are detected in an apartment, and not long afterward the perpetrator is revealed as well: noted poet Emmanuel Goldsmith. The LAPD’s Mary Choy—who has had both her appearance and her police work enhanced by nanotechnology—is tasked with arresting the killer, while psychotherapy pioneer Martin Burke prepares to explore his mind. Meanwhile, Goldsmith’s good friend and fellow writer reels at the news—while, far from all of them, a space probe makes a startling discovery. This “excellent” novel about technology, identity, and the nature of consciousness is a thought-provoking stunner by the Nebula Award-winning author of the Eon series and the Forerunner Saga (Chicago Tribune).

Tangents *Millennium Orion Publishing Group*

Multi-award winning author Greg Bear established himself as the most ambitious and imaginative of the potential successors to Arthur C. Clarke with his bestselling space operas Eon and Eternity. Tangents is his first collection of short stories and includes two tales that won both Hugo and Nebula Awards: ¿Tangents¿ a remarkable account of contact with beings from another dimension, and the original short version of his classic novel Blood Music.

Dinosaur Summer *Open Road Media*

“Certain to become a new classic of adventure beyond time . . . An unofficial sequel to Sir Arthur Conan Doyle’s The Lost World” (Prehistoric Pulp). Fifty years after Professor Challenger’s discovery of the Lost World, America’s last dinosaur circus has gone bankrupt, leaving a dozen avisaur, centrosaur, ankylosaur, and one large raptor abandoned. Now a daring expedition plans to do the impossible: return the Jurassic giants to the wild. Two filmmakers, a circus trainer, a journalist, and a young Peter Belzoni must find a way to take the dinosaurs across oceans, continents, rivers, jungles, up a mountain that has been isolated for seventy thousand years . . . Then, if they make it, all they will do is face the prehistoric wonders, dangers, and terrors of the Lost World.

Psychlone *Open Road Media*

An evil spawned from the horrors of World War II wreaks havoc on a small New Mexico town in this novel from the “master of the grand-scale SF novel” (Booklist). Curiosity may kill Larry Fowler. A scientist from New Mexico, Fowler is hot on the trail of a mysterious phenomenon that is known to freeze animals instantly and can demolish an entire town. Part ghost story, part science fiction, part political treatise, Greg Bear’s novel tracks Fowler on

his journey to discover the true nature of the PSYCHLONE.

Hull Zero Three *Orbit*

A starship hurtles through the emptiness of space. Its destination - unknown. Its purpose - a mystery. Now, one man wakes up. Ripped from a dream of a new home - a new planet and the woman he was meant to love in his arms - he finds himself wet, naked, and freezing to death. The dark halls are full of monsters but trusting other survivors he meets might be the greater danger. All he has are questions -- Who is he? Where are they going? What happened to the dream of a new life? What happened to Hull 03? All will be answered, if he can survive the ship.

Songs of Earth And Power *Macmillan*

The Song of Power opened the gateway to the Realm of the Sidhe, allowing young Michael Perrin to slip through. Now Michael faces years of captivity and deadly struggles for the future of the Realm and of Earth--leading finally to a terrible confrontation on the streets of Los Angeles, with the soul of humanity at stake. Weaving the power of music, poetry, and myth into a headlong narrative of nearly overwhelming intensity, Song of Earth and Power is one of the most original fantasy epics of our time, a vast tapestry of relentless suspense, terrible beauty, and brilliant imagination. Originally published years ago in two parts, it now returns in a new edition rewritten by the author and published in a single volume as he originally intended. Wrote Analog on its original appearance: "A delight....A vision of Faery that may owe a bit to a wish to do it right. Read it."

Just Over the Horizon *Open Road Media*

The New York Times Book Review hails this collection of thirteen dazzling stories and a rare screenplay by Hugo and Nebula Award-winning author Greg Bear as a “solid introduction to the oeuvre of a classic writer.” Greg Bear—author of Queen of Angels, Eon, and Hull Zero Three, among many other hugely popular novels—has an ability to transform challenging scientific concepts into gripping fiction that has won him numerous awards and an avid following. He has written novels about interstellar war, human evolution, intelligent bacteria, international terrorism, and the exploration of deep space—but he doesn’t stop there. This brilliant collection of Bear’s stories, each newly revised by the author, proves he is a master of the short form as well. Just Over the Horizon offers thirteen mind-bending explorations of the near future . . . or just beyond the border of conventional reality. The volume includes: · “Blood Music,” a Hugo and Nebula award-winning classic and the basis for the novel of the same name—and the first science-fictional exploration of nanotechnology; · “Sisters,” in which high school students find maturity and family by confronting a tragic genetic destiny; · “Tangents,” winner of the Hugo and Nebula Awards, about a persecuted scientist who seeks refuge in a better world; · “Dead Run,” a tale of union truck drivers ferrying souls through Death Valley into Hell, adapted for an episode of the television series The Twilight Zone; · “Sleepside Story,” which Bear calls one of his favorite pieces, an urban fantasy tale that takes a music student by Night Metro to the Sleepside mansion of a magical woman of the night, inverting “Beauty and the Beast” in a very modern mirror; · “Genius,” the screenplay written for the television series Outer Limits, but never produced. Just Over the Horizon combines Bear’s intense concern with the human condition with a deep understanding of science, resulting in a collection long to be remembered.

The Unfinished Land *John Joseph Adams*

A sweeping Elizabethan historical fantasy from an internationally renowned author that evokes the seafaring adventures of Robert Louis Stevenson with the magic of *The Bear and the Nightingale*

Darwin's Radio *Ballantine Books*

HUGO AWARD FINALIST • "WOW! What a splendid (scary) notion: a human upgrade! What a superb plot! *Darwin's Radio* is bloody damned good."—Anne McCaffrey "Virus hunter" Christopher Dicken is a man on a mission, following a trail of rumors, government cover-ups, and dead bodies around the globe in search of a mysterious disease that strikes only pregnant women and invariably results in miscarriage. But when Dicken finds what he's looking for, the answer proves to be stranger—and far deadlier—than he ever could have imagined. Something that has slept in human DNA for millions of years is waking up. Molecular biologist Kaye Lang has spent her career tracing ancient retroviruses in the human genome. She believes these microscopic fossils can come to life again. But when Dicken's discovery becomes public, Lang's theory suddenly turns to chilling fact. As the outbreak of this terrifying disease threatens to become a deadly epidemic, Dicken and Lang must race against time to assemble the pieces of a puzzle only they are equipped to solve—an evolutionary puzzle that will determine the future of the human race . . . if a future exists at all. Praise for *Darwin's Radio* "Bear is one of our very best, and most innovative, speculative writers."—*New York Daily News* "Superb . . . Bear's novel is frighteningly believable with a lot of clearly explained hard science, but the personal struggles of the well-realized characters keep everything on a human level."—*Focus* "Bear is a writer of passionate vision."—*Locus* "*Darwin's Radio* scores a high rating on the thrill monitor."—*Birmingham Post* (England) "Absorbing and ingenious."—*Kirkus Reviews*

Strength of Stones *Open Road Media*

Artificially intelligent cities rise up against humanity in this "excellent novel. It came on me as a surprise, and it knocked me out!" (Harlan Ellison). In a theocratic world far into the future, cities control their own movements and organization. Constantly moving, growing and decaying, taking care of every need their inhabitants might think of, the cities have decided that humans are no longer a necessary part of their architecture, casting them out to wander in the wilderness and eke out a meager subsistence. To the exiled humans, the cities represent a paradisiacal Eden, a reminder of all they cannot attain due to their sinful and unworthy natures. But things are beginning to change. People are no longer willing to allow the cities to keep them out, choosing instead to force an entry and plunder at will. The cities are starting to crumble and die because they have no purpose or reason to continue living without citizens. One woman, called mad by some and wise by others, is the only human allowed to inhabit a city. From her lonely and precarious position at the heart of one of the greatest cities ever, she must decide the fate of the relationship between human society and the ancient strongholds of knowledge, while making one last desperate attempt to save the living cities.

Many are even malevolent . . . and hungry . . . and deadly. As the death toll of Trans-users skyrockets, Peter's life begins a new spiral downward. Now, he must race to make sense of the horror Trans has wrought before the gateway to Hell bursts wide open. Eternity *Open Road Media*

The New York Times–bestselling author of *Eon* continues the interstellar saga of the Way. A devastating war has left Earth a nuclear wasteland. Orbiting the planet is the asteroid-starship containing the civilization of Thistledown, humanity’s future descendants. For decades, they have worked to heal their world and its survivors, but their resources are finite. They need to reopen the Way. An interdimensional gateway to a multiverse of realities, the Way was severed from Thistledown to stop an alien invasion and now exists as its own universe. Reopening the gate would not only benefit Earth but would also help the asteroid’s residents return home. But on the alternate world of Gaia, Rhita Vaskayza, daughter of mathematician Patricia Vasquez, has taken up her mother’s cause to find her own Earth, one that was never touched by nuclear war. There is a gateway on Gaia that could lead Rhita there—or unleash an even greater apocalypse across the multiverse . . . “Whether he’s tinkering with human genetic material or prying apart planets, Bear goes about the task with intelligence and a powerful imagination. *Eternity* offers many delights” (Locus).

Slant *Open Road Media*

The “reigning master of hard-edge science fiction takes a chilling look at the plausible near-future” in this cyberpunk sequel to *Queen of Angels* (Seattle Post-Intelligencer). In the second half of the twenty-first century, nanotechnology has transformed every aspect of society. Humans can now change their abilities, their appearance, their very bodies on microscopic level. Advanced psychotherapy seems to have wiped away violence and illness. The world is sane and in balance. However, that balance teeters with the grisly murder of two prostitutes and a series of suicides. Soon, public defender Mary Cho’s investigation finds a dark danger lurking in the recesses of the “dataflow.” Entertainment, virtual pornography, neo-Luddite separatists, an unknown artificial intelligence—everything seems to be intertwined in a vast conspiracy. As technology fails so too does the society perched high atop it. Perfection is a high pedestal from which to fall.

The Light of Other Days *Tor Books*

From Arthur C. Clarke, the brilliant mind that brought us *2001: A Space Odyssey*, and Stephen Baxter, one of the most cogent SF writers of his generation, comes a novel of a day, not so far in the future, when the barriers of time and distance have suddenly turned to glass. When a brilliant, driven industrialist harnesses cutting-edge physics to enable people everywhere, at trivial cost, to see one another at all times—around every corner, through every wall—the result is the sudden and complete abolition of

human privacy, forever. Then the same technology proves able to look backward in time as well. *The Light of Other Days* is a story that will change your view of what it is to be human. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Iron Maiden *Open Road Media*

From a New York Times–bestselling author: The revealing final book in this sci-fi epic tracks the rise and fall of Jupiter’s tyrant—from the perspective of his sister. The final installment of the *Bio of a Space Tyrant* series covers the same period as the first five books, but with a twist. *The Iron Maiden* is told from the point of view of Hope’s sister, Spirit. This book fills in the gaps when the two siblings were apart and perfectly wraps up this scintillating series!

War Dogs *Hachette UK*

The Gurus came in peace, bearing gifts. They were a highly advanced, interstellar species who brought amazingly useful and sophisticated technology to the human race. There was, of course, a catch. The Gurus warned of a far more malevolent life form, beings who have hounded the Gurus from sun to sun, planet to planet, across the cosmos. Pundits have taken to calling them the Antagonists - or Antags - and they have already established a beachhead on Mars. In exchange for all they've done for us, the Gurus would now like our help. Enter Master Sergeant Michael Venn, a veteran Skyrine (a Marine who is specially trained for off-world combat) who is dropped onto the Red Planet with his band of brothers on a mission to take down as many Antags as possible. But from the moment they're dropped through the thin Martian atmosphere, their mission goes horribly, terribly wrong. From a group of female special ops Skyrynes with secret orders, to mysterious humans who've settled on Mars, to the overwhelming and highly-reinforced Antags themselves, Venn and his brothers will face impossible odds just to survive - let alone make it home alive.

Mariposa *Hachette UK*

The world just keeps getting tougher and more complicated. America teeters on the edge of bankruptcy because of crushing foreign debt and an apparent savior, The Talos Corporation, delivers training for soldiers and security forces around the world, logistical support and badly-needed troops economically, but with a hidden cost that's both sinister and disturbing. The three rookie FBI agents who survived the challenges portrayed in *Quantico*, have gone their separate ways but seem fated to be drawn back together in an alliance against a surprising challenge for which no one seems prepared. Rebecca Rose is brought back from an extended sabbatical when the President is shot and her second-in-command is implicated in an horrific crime - and all the threads point deeper into Talos's secretive activities. Fouad Al-Husam, working undercover inside Talos, has uncovered and been forced to hide vital information of a takeover plot that threatens America's independence. Nathan Trace, victim of a violent incident in the Middle East, struggles with post-traumatic stress and seems to be recovering through participation in a treatment program, code-named Mariposa, which has unexpected side-effects that turn patients into brilliant, detached and sociopathic individuals - very smart and extremely deadly. Only a desperate combination of misfits and survivors can combat an apparently inevitable collapse of American organization that will lead to the fall of democracy.

And before she faces the prejudices and arrogance of the people there, Snake must make her way across a barren desert, surviving storms and radiation poisoning, helping those she can—all while a madman stalks her every move . . . “[Dreamsnake] is filled with scenes as suspenseful as anyone could wish . . . but most of all it addresses the humanity in all of us.” —The Seattle Times “A haunting, rich, and tender novel that explores the human side of science fiction in a manner that’s all too uncommon.” —Robert Silverberg “A splendid tale, combining

the sensitivity and attention to mood of the new generation of SF writers with a gripping and well-worked-out adventure . . . The novel is rich in character, background and incident—unusually absorbing and moving.” —Publishers Weekly “Instead of kicking butt, the lead character is dedicated to saving lives. . . . Snake’s blighted world is expertly drawn, and her encounters with dysfunctional societies can be bracing and challenging reading.” —The Guardian “This is an exciting future-dream with real characters, a believable mythos and, what’s more important, an excellent, readable story.” —Frank Herbert, author of the *Dune* series
