Abstract. Trustless public ledgers (“TPLs”)—the technology
 underneath Bitcoin—do more than just create online money. The
 technology permits people to directly exchange money for what
 they want, with no intermediaries, such as credit card companies.
 Contract law is the law of bargained-for exchange, so a
 technology that enables direct exchange online will change the
 reality of online contracting.

Bitcoin: The Blockchain for Truly Smart Contracts | by ...

What's a Bitcoin Smart Contract? The idea of a smart contract originated by Nick Szabo. He was the first person to really question the purpose of security and discusses a great example of a vending machine and a smart lien protocol in this great article. Smart contracts are contracts that use software (usually a web/mobile app) and protocols to facilitate, verify, or enforce the negotiation or performance of a contract eliminating any third parties/laws.

Smart Contracts with Bitcoin

The Bitcoin blockchain is not known for its ability to enable smart contracts. In fact, most developers creating smart contracts use a different blockchain, like Ethereum. But the truth is that the Bitcoin protocol can be used to create smart contracts. Particl.io, the blockchain eCommerce platform, is doing just that by using Bitcoin-based smart contracts to manage funds in their trustless escrow: Mutually Assured Destruction (MAD) escrow.

Yes, Bitcoin Can Do Smart Contracts and Particl ...

A smart contract is an agreement between two people in the form of computer code. They run on the blockchain, so they are stored on a public database and cannot be changed. The transactions that happen in a smart contract are processed by

the blockchain, which means they can be sent automatically without a third party.

What is a Smart Contract and How do Smart Contracts Work

Smart contracts are disintermediated and generally transparent in nature, offering the promise of increased commercial efficiency, lower transaction and legal costs, and anonymous transacting. The business world is actively investigating the use of blockchain technology for various commercial purposes.

Is a 'smart contract' really a smart idea? Insights from a ...

Smart contract functionality would mean that Bitcoin would have some of the same capabilities as other blockchains like Ethereum, EOS, and TRON. What Does Schnorr/Taproot Bring to Bitcoin? The Schnorr/Taproot soft fork will expand BTC's functionality immensely: increased privacy, scaling, multi-sig applications, and even better transaction speed are all made possible by the upgrade.
