Infrastructure for the Built Environment: Global ...

Infrastructure and the Built Environment need to be fit for purpose for supporting societal development in a changing world. Our research looks for solutions for a sustainable and resilient future – one where scarce natural resources are used effectively and where the ever-increasing urbanisation of the world means we have cities which work for their inhabitants, not the other way round!

Recruitment for the Built Environment & Infrastructure ...

The term 'built environment' refers to aspects of our surroundings that are built by humans, that is, distinguished from the natural environment. It includes not only buildings, but the human-made spaces between buildings, such as parks, and the infrastructure that supports human activity such as transportation networks, utilities networks, flood defences, telecommunications, and so on.

Built environment - Designing Buildings Wiki

Infrastructure and the Built Environment Sea level rise, flooding, and more frequent extreme precipitation and excessive heat events threaten to compromise the Northeast's extensive infrastructure systems. Buildings, roads, railways, airports, ports, and utility systems face increasing risk from weather- and climate-related events.

Infrastructure and the Built Environment | U.S. Climate ...

UKGBC's vision for a sustainable built environment is one that mitigates and adapts to climate change. The built environment contributes around 40% of the UK's total carbon footprint. Almost half of this is from energy used in buildings (eg plug loads and cooking) and infrastructure (eg roads and railways) that has nothing to do with their functional operation.
