Learning Theories are frameworks that are extensively used by Instructional Designers to meet the requirements of the target audience and the situation. To do justice to this mandate, an Instructional

Designer must first understand the Learning Theories in order to apply them. Once they understand the strengths and weaknesses of each Learning Theory, they can optimise their use.

3 Traditional Learning Theories and How They Can Be Used ...

Experiential learning is about the learner experiencing things for themselves and learning from them. Kolb (1984) proposed a four stage model known as the experiential learning cycle. It is a way by which people can understand their experiences and, as a result, modify their behavior.
