network resources from peer to peer relationships. Peer to peer network is useful for a small network containing less than 10 computers on a single LAN . In peer to peer network each computer can function as both client and server. Peer to peer networks do not have a central control system. There are no servers in peer networks.

BASIC CONCEPTS OF NETWORK

This means you. If you have a network of, let's say, three computers and your network IP address is 172.16.0.0 you can assign the first computer's IP address to be 172.16.0.1 then the second computer's IP address can be 172.16.0.2, and the third can be 172.16.0.3. This allows you to keep your network a little more organized.

What is Network Design? - Definition from Techopedia

To design reliable, scalable networks, network designers must realize that each of the three major components of a network has distinct design requirements. A network that consists of only 50 meshed routing nodes can pose complex problems that lead to unpredictable results. Attempting to optimize networks that feature thousands of nodes can pose even more complex problems. Despite improvements in equipment performance and media capabilities, network design is becoming more difficult.
