Wind energy was the source of about 7%
of total U.S. electricity generation and
about 42% of electricity generation from
renewable energy in 2019. Wind turbines
convert wind energy into electricity.
Biomass was the source of about 1% of
total U.S. electricity generation in 2019.
Biomass is burned directly in steam-
electric power plants, or it can be
converted to a gas that can be burned in
steam generators, gas turbines, or

internal combustion engine generators.
