No Flying in the House *Harper Collins*

Annabel Tippens seems like an ordinary little girl, with short blond hair and very good manners. But Annabel is actually quite unusual. Instead of parents, she has Gloria, a tiny white dog who talks and wears a gold collar. Annabel never wonders why her life is different, until one day a cat named Belinda tells her the truth - she's not just a little girl, she's half fairy! But now that she knows the truth, will her whole life have to change?

The Girl Who Could Fly *Feiwei & Friends*

You just can't keep a good girl down . . . unless you use the proper methods. Piper McCloud can fly. Just like that. Easy as pie. Sure, she hasn't mastered reverse propulsion and her turns are kind of sloppy, but she's real good at loop-the-loops. Problem is, the good folk of Lowland County are afraid of Piper. And her ma's at her wit's end. So it seems only fitting that she leave her parents' farm to attend a top-secret, maximum-security school for kids with exceptional abilities. School is great at first with a bunch of new friends whose skills range from super-strength to super-genius. (Plus all the homemade apple pie she can eat!) But Piper is special, even among the special. And there are consequences. Consequences too dire to talk about. Too crazy to consider. And too dangerous to ignore. At turns exhilarating and terrifying, Victoria Forester's debut novel has been praised by Stephenie Meyer, author of the Twilight saga, as "the oddest/sweetest mix of Little House on the Prairie and X-Men...Prepare to have your heart warmed." The Girl Who Could Fly is an unforgettable story of defiance and courage about an irrepressible heroine who can, who will, who must . . . fly. This title has Common Core connections. Praise for Victoria Forester and The Girl Who Could Fly: "It's the oddest/sweetest mix of Little House on the Prairie and X-Men. I was smiling the whole time (except for the part where I cried). I gave it to my mom, and I'm reading it to my kids—it's absolutely multigenerational. Prepare

to have your heart warmed." Stephenie Meyer, author of the Twilight saga "In this terrific debut novel, readers meet Piper McCloud, the late-in-life daughter of farmers...The story soars, just like Piper, with enough loop-de-loops to keep kids uncertain about what will come next....Best of all are the book's strong, lightly wrapped messages about friendship and authenticity and the difference between doing well and doing good."--Booklist, Starred Review "Forester's disparate settings (down-home farm and futuristic ice-bunker institute) are unified by the rock-solid point of view and unpretentious diction... any child who has felt different will take strength from Piper's fight to be herself against the tide of family, church, and society."--The Horn Book Review The Girl Who Could Fly is a 2009 Bank Street - Best Children's Book of the Year.

The Shades *Orion*

Hollis is scared when he first comes to stay with Emily Peters. Then he discovers the magic of the dolphin fountain and meets the Shades, the shadows of all the people who have ever visited the garden.

GRE 4000

The 4000 Words Essential for the GRE *Nova Press*

The verbal section of the GRE is essentially a vocabulary test. With a few exceptions, if you know the word, you will probably be able to answer the question correctly. Thus, it is crucial that you improve your vocabulary. Even if you have a strong vocabulary, you will still encounter unfamiliar words on the GRE. Many students write off questions, which contain words, they don't recognize. This is a mistake. This book introduces numerous techniques that decode unfamiliar words and prod your memory of words you only half-remember. With these techniques, you will often be able to squeeze out enough meaning from an unfamiliar word to answer a question correctly. Amelia Earhart's Final Flight

On Amelia Earhart's Final Flight She Landed on Mili Atoll and Was Captured by the Japanese.

The Versailles Treaty after WWI "Mandated Islands" in the Pacific to the Japanese. President Roosevelt felt the Japanese were illegally installing military fortification on these "Mandated Islands" which was in direct violation of the WWI Treaty. Amelia Earhart, a popular female pilot who set many aviation records, wanted to increase her popularity by flying around-the-world. This would be a huge accomplishment that no pilot, man or woman, had attempted before. She left California, March 17, 1937, in a twin-engine Lockheed Electra and flew to Honolulu on the first leg of her historic flight with Fred Noonan and Harry Manning as her navigators. Unfortunately, she crashed on take-off and her Electra was so badly damaged, it had to be shipped back to the Lockheed plant in California for repairs. Amelia and her publisher husband, George Putnam didn't have the money to repair her Electra and make another attempt to fly around-the-world, so Mr. Putnam approached President Roosevelt and asked if the U.S. government could help? FDR had met Amelia previously and knew of her plans to fly around-the-world. In 1937, FDR believed the Japanese were illegally preparing for war on "Mandated" islands in the Pacific. Marine Colonel Earl Ellis tried to sneak into Truk Atoll to gather information, but was caught on the island of Palau and killed. FDR believed that maybe a civilian pilot who was going to fly around-the-world might have a better chance to obtain the information he needed, so agreed to help Amelia on her request. But, FDR only did so, if Amelia would agree to take a few pictures of Japanese island fortifications along the way. Although a staunch 'pacifist' Amelia agreed to the president's stipulations. The U.S. government helped plan her second attempt, provided her plane with larger engines, installed additional fuel tanks and reconnaissance cameras, but did so with little fanfare or publicity. Instead of flying from East to West as she planned on her first attempt, she flew West to East with only Fred Noonan as her navigator. Prior to her flight it's reported she was sworn into the Army Air Force as an officer and confided to a friend, "Imagine me being a spy!" Amelia left California on May 21st and headed for Miami, Puerto Rico, Brazil, Africa, India, Bangkok, Singapore and Dutch East Indies, where Mr. F.O. Furman, a Lockheed maintenance specialist, met Amelia and checked her Electra and cameras for 3-days. At each stop, 55-gallon drums of fuel would be waiting for her, even if she flew into a field that was not on her announced itinerary. She and Fred Noonan left Lae, New Guinea on July 1st, 1937 and headed for Howland Island, 2,556 miles away. The Coast Guard Cutter ITASCA waited just off Howland to handle all communications as she approached. Unfortunately, when Harry Manning was the designated navigator on her first attempt, he arranged for Navy ships to communicate with her in Morse Code. No one told the Navy vessels that Manning was no longer her navigator. Neither

Amelia or Fred could read Morse Code! Amelia Earhart's Final Flight tells the story of how she crashed on Mili Atoll in the Marshall Islands, was captured by the Japanese, taken to Saipan where she was held in prison for several years before being killed. Eye-witnesses in the Marshall Islands and on Saipan provided the true accounts of what actually happened to Amelia on her historic flight, what happened when she was captured, how she was killed and reaction by U.S. and Japanese leaders. It also relates how U.S. Marines found Amelia's briefcase and also found her Electra on Saipan when they attacked in 1944. David O'Malley, a member of the Writers Guild, wrote an interesting screenplay that's based on these eye-witness reports. It gives a rational explanation why both the U.S. and Japan have kept Amelia's capture and death a secret since her Final Flight.

The Miraculous Flying House of Loreto

Spreading Catholicism in the Early Modern World *Princeton University Press*

In 1295, a house fell from the evening sky onto an Italian coastal road by the Adriatic Sea. Inside, awestruck locals encountered the Virgin Mary, who explained that this humble mud-brick structure was her original residence newly arrived from Nazareth. To keep it from the hands of Muslim invaders, angels had flown it to Loreto, stopping three times along the way. This story of the house of Loreto has been read as an allegory of how Catholicism spread peacefully around the world by dropping miraculously from the heavens. In this book, Karin Vélez calls that interpretation into question by examining historical accounts of the movement of the Holy House across the Mediterranean in the

thirteenth century and the Atlantic in the seventeenth century. These records indicate vast and voluntary involvement in the project of formulating a branch of Catholic devotion. Vélez surveys the efforts of European Jesuits, Slavic migrants, and indigenous peoples in Baja California, Canada, and Peru. These individuals contributed to the expansion of Catholicism by acting as unofficial authors, inadvertent pilgrims, unlicensed architects, unacknowledged artists, and unsolicited cataloguers of Loreto. Their participation in portaging Mary's house challenges traditional views of Christianity as a prepackaged European export, and instead suggests that Christianity is the cumulative product of thousands of self-appointed editors. Vélez also demonstrates how miracle narratives can be treated seriously as historical sources that preserve traces of real events. Drawing on rich archival materials, *The Miraculous Flying House of Loreto* illustrates how global Catholicism proliferated through independent initiatives of untrained laymen.

The Very Last Seat on the Plane *Createspace Independent Publishing Platform*

Less than twelve hours before take-off, after her brother called from far-off California, her place of original derivation, Gwendolyn booked a flight on Southwest Airlines, the only coterie of the aerial velocity where she was able to muster up a ticket for this kind of urgency. Urgency, because you see, Gwendolyn's Dad of forty odd years had just suffered a massive heart attack, declared legally dead for approximately one half hour, and through the fortune or misfortune of modern technology, first responders were able to bring him back to life, from a legal perspective only, the second Friday in June 2016 between the hours of 10:20 and 10:50 a.m. By the time Gwendolyn received news of this, it was Monday, and she could not have been in a higher geographical location in Montana, on a National Bison Range, no less, crowded by snow covered mountain peaks. Returned home she did to Florida, on Tuesday. She booked a flight Wednesday night for Thursday before sunrise, arriving in Los Angeles at 9:50 a.m. Not

knowing what to expect, and hoping for the best, yet in her heart, she knew... She knew she would be visiting her dad on his deathbed, and more than likely assisting in the advising of "pulling the plug," from life support. From Tampa to Las Vegas was tough: Flying out of tropical depressions always are. Yet, from Las Vegas to Los Angeles proved to be the last thing Gwendolyn had expected, as she seized the last seat on the plane in the very first row, left side, middle seat, between an old man in the aisle, and the window seat already inherited by a man, who was quite attractive, with model-type healthy hair, the darkest blue eyes she had ever seen, in his thirties, painfully fit, and although she found out later around the baggage belt, about 6'7" in height, who preoccupied his time by reviewing the Wisconsin volleyball athletes he coached on his portable electronic tablet. "Is this seat taken?" Gwendolyn asked both men, to her immediate left, referring to the seat in between them, yet more directed toward the man by the window.

Once a Jock... Always a Jock!!

Recollections of the Flying Midshipmen *CreateSpace*

Definition: Jock n. (informal): A pilot or astronaut, an abbreviation of jockey as in throttle jockey or jet jockey. "Once a Jock . . . Always a Jock" is a compilation of three hundred stories written by the first postwar generation of Naval Aviators who began their training in late 1945 as teenagers fresh out of high school. A 16 week Pre-Flight school started the clock running on a two year contract where each future Navy pilot held the rank of Aviation Midshipman, USN. The clock was still running when they earned their gold wings and were assigned to fleet squadrons. These Flying Midshipmen flew every aircraft in the Navy's arsenal. Eventually they were sworn in as commissioned officers and went on to participate in every major aviation event from the Berlin Airlift, the Korean War, and the Cold War to the conflict in Vietnam. Readers of these stories will discover what motivated 3,000 high school kids to fly for the Navy. They will learn what it was like to be a Flying Midshipman at the bottom of the pecking order aboard ship or as a pilot in an aircraft squadron. Today's young pilots will gain some useful knowledge about training mishaps and accidents that could have been avoided. They will be thrilled by accounts of My First Corsair Flight or My First Jet Flight or My First Cat Shot. They might reflect on the sobering story of Jesse Brown, the African American who broke the color barrier in Naval Aviation the same year that Jackie Robinson broke the color barrier in major league baseball. Those who have flown as civilian or military pilots will find themselves in the narrow escapes and the humor in the aftermath of bad judgment, and above all, in their great love of flying. They will learn what it is like to land a battle damaged fighter on an aircraft carrier in bad weather or how a pilot blinded by enemy flak was guided by his friend to successful wheels-up landing. Reading these stories, veteran flyers may remember the long monotonous anti-submarine and maritime patrols that ended in moments of stark terror. Anyone who never sat in the left seat of a flying boat may be surprised to know that seaplane pilots had to supplement their flying skills with a firm knowledge of seamanship. They can read about it in Chapter 16, Flying Boat Jocks. Of course the book has stories for helicopter jocks and transport pilots and instrument pilots and flying in all kinds of climate from the arctic to the

tropics. For the poetry minded, there are some of those too. These stories should appeal to anyone who has ever dreamed about flying. And most important, 100% of the proceeds from sales of the book will be directed to the Flying Midshipmen Endowment Fund for support of the Youth Aviation Training Program aboard the USS Midway Museum in San Diego.

Multiplying the 2% *Createspace Independent Publishing Platform*

The unfathomable rate of Black males in education should result in a national call to action. Across the country Black males represent only 2% of the teaching workforce. By the year 2024, minority students will be the majority, yet our current education workforce does not reflect this growing trend in what has been called "The Browning of America." Why is it acceptable that a student can matriculate from Kindergarten through twelfth grade and not have one Black male as his or her teacher? Why has it been a challenge to recruit and in many instances retain Black males in the classroom? Unopened Books explains what is referenced in the book as the Five Black Male Deterrents in Education. Through the personal narrative of Jermaine D. Gassaway, a native Washingtonian, educator, and school leader; coupled with practical solutions, Unopened Books provides insight to multiply the 2%. It is intended to not only be a provocative conversation starter but an actionable approach to increase the number of Black men in the classroom.

Mr. Rebound *Createspace Independent Publishing Platform*

Moving across the country was supposed to be a fresh start. I'd made mistakes, but I told myself I'd no longer prey on emotionally unstable women. I don't do relationships-I'm a selfish bastard that enjoys not answering to anyone-and relationships mean being with only one woman. More often than not, one that carries emotional baggage, like cheating exes or worse-kids. After landing myself in trouble, again, my cousin Charlie dared me to settle down with one woman. I'm not one to shy away from a dare, so I chose Scarlett Winters, the most wanted actress in Hollywood. The sexiest woman on Earth. I just needed to get past the roadblock-her assistant, Morgan Bentley. The wicked bitch of the west. Between her multiple personalities and the giant stick up her ass, I should've seen it coming. I'd been with enough women to read the signs. Morgan Bentley was after one thing, and one thing only. A rebound. That's me, right? Mr Rebound. But what if this time I wanted more?

The Age of Flying Saucers: Notes on the History of Unidentified Flying Objects

Translated from the original French edition, this is a comprehensive history of the first 25 years of the UFO phenomenon in the United States, containing many actual case histories accompanied by the author's close analysis. Given the limited state of knowledge at the time of publication, the author's conclusions are startling. (Fans of John A. Keel's four-dimensional thesis will find much to chew on in these pages.)According to the author, Paris Flammonde, the Age of UFOs began on June 24, 1947 with Kenneth Arnold's famous sighting. It reached its peak

in the late 1950s, when thousands of people came down with sauceritis and began meeting the space people face-to-face. Why? The author's theory is that it was partly mass psychosis, stemming from the demise of religion and the death of God. People were ripe for new and otherworldly messiahs, leading to the rapturous ""contactee"" reports about higher civilizations benignly watching over us - and guiding us. But that is just part of the puzzle, because the sightings and contacts were often accompanied by documented physical evidence. This comprehensive book is more than just a list of interesting sightings and encounters, however. It also provides a social history of the flying saucer culture that resulted from those incidents. Topics covered include saucer cults and religions, the evolution of government handling of the matter, conspiracies, and contactees. Flammonde also proposes a framework that sets the stage for the phenomenon to grow and propagate. This classic book is a must-have for all serious ufologists and UFO buffs.

I Am Perfect *Lubybuby*

A song book that highlights that inside everyone there is a perfect and loving heart, and that if we uncover our perfection and recognise it in others we can change the world for the better. The song takes you through the personal journey of a little monster who discovers his self worth is not defined by his physical characteristics or by the definitions placed on him by others, but by how he allows his light and love to shine. Once he understands his own value he is able to see the perfection in others even when they are hurtful. He then goes on to show that if we all recognised the perfection in each other and acted from a place of love we can change the world to a better place. "Let us live the perfection that we are and uncover ourselves to shine like a star. Our potential never stops to spread love on this earth, it is why we are here, it is the reason for our birth."
