Engineers in multiple disciplines environmental, chemical, civil, and mechanical contribute to our understanding of air pollution control. To that end, Noel de Nevers has incorporated these multiple perspectives into an engaging and accessible overview of the subject.

Air Pollution Control Engineering, Third Edition: Noel de ...

Air pollution engineering consists of two major components: (1) air pollution control and (2) air quality engineering. Air pollution control focuses on the fundamentals of air pollutant formation in process technologies and the identification of options for mitigating or preventing air pollutant emissions. Air quality engineering deals with large-scale, multi-source control strategies, with focus on the physics and chemistry of pollutant interactions in the atmosphere.

Trump administration hobbles air pollution control

This chapter is devoted mainly to the description of air pollution control by "bolt-on" devices, but these are usually the most expensive means of control. A general environmental engineering truism is that the least expensive and most effective control point is always the farthest up the process line.
