The first jump is triggered immediately by the pressure plate (though it does go through a diode and wire color change first). This wire also activate 7 hammered dart traps that are pointing downward, towards a stair case of teal pressure plates. These pressure plates activate on impact, and as they are only one square further from the darts than their predecessor, each step happens 1/45 of a second after the last, for a total transit time for 8 jumps of 0.17 seconds.
