SRK assisted OCL with an integrated mine water management study for its limestone pits at Lanjiberna. The Lanjiberna limestone and dolomite deposit comprises two parallel limestone bands extending east-west and separated by a 150 m wide dolostone band. Three main quarries are operating – Q-1, Q-2 and Q-3. The operating pits remain flooded for the monsoonal months and beyond, causing significant challenges with respect to achieving production targets.

SRK Consulting | Lanjiberna Mine Water Management

SRK recognises that the key to effective mine water management is a sound understanding of the process and tailings circuits, and integrating this with climatic data, and recycling opportunities to form an interactive range of water balances, responsive to process, seasonal and climatic variations pertinent to the mine at any time.
