Evaluating Learning Algorithms: A Classification ...

Evaluating your machine learning algorithm is an essential part of any project. Your model may give you satisfying results when evaluated using a metric say `accuracy_score` but may give poor results when evaluated against other metrics such as `logarithmic_loss` or any other such metric. Most of the times we use classification accuracy to measure the performance of our model, however it is not enough to truly judge our model.

Supervised learning algorithms further classified as two different categories. Classification Algorithms; Regression Algorithms; Classification Algorithms. If the target value is categorical values like input image have a chair (label 1) or not having a chair (label 0) then we apply the techniques of classification algorithms. This means we will classify the features to any one of the available classes or labels.
