Dialogic Education and Technology: Expanding the Space of ...

Dialogic education is an educational philosophy and pedagogical approach that draws on many authors and traditions. In effect, dialogic education takes place through dialogue by opening up dialogic spaces for the co-construction of new meaning to take place within a gap of differing perspectives. In a dialogic classroom, students are encouraged to build on their own and others' ideas, resulting not only in education through dialogue but also education for dialogue.

Dialogic education - Wikipedia

A more political interpretation of dialogic education can be seen in the vision of Freire (1971) and those influenced by Freire (e.g Flecha, 2009) of dialogic education as a way to empower the oppressed such that they can learn to 'name' their own reality in a movement that is both an expansion of consciousness ('conscientization') and at the same time a transformation of social reality.
