Construction - Health and Safety Executive

The construction industry is certainly one of the more hazardous workplaces, but the vast majority of its associated risks can be avoided with proper health and safety measures. Health and safety processes play a vital role in minimising the number of risks on a construction site and, as such, they should be implemented from the start. When managers fail to introduce these health and safety measures, it's very easy for risks to rise and for accidents to occur as a result.

Why Health & Safety Is Important In

Construction | TSMC

Health and safety for building design and construction. Buildings can present a great number of possible risks both in construction and operation. There are many duties placed on those commissioning, designing, constructing and operating buildings to control those risks. The legislation affecting health and safety in design and construction falls under the Health and Safety at Work etc. Act through regulations that include:
