Introduction | Jaspersoft Community

One of the main goals of JasperReports Server is to expose a set of reusable application programming interfaces (APIs) that are easy to understand, extend, and customize. This facilitates adapting JasperReports Server to the unique requirements of different deployments. We provides two types of APIs.

JasperReports Library. JasperReports is a open source Java based reporting tool. The JasperReports Library can be downloaded from the Jaspersoft Community for the latest release. In recent releases the third-party jars in the lib folder are not distributed, they need to be download from public repositories, see distributed pom.xml for dependencies. Maven can be used to retrieve all dependencies including the transient ones in the

target/dependence folder.

The HTTP interface provides an easy way to implement the API for accessing repository objects. However, the HTTP interface can't be embedded the way the web services and Visualize.js APIs can be in non-Jaspersoft applications. Rather, the HTTP interface is used primarily as shortcuts or entry points to commonly used features or content.
