Low platelet count (thrombocytopenia): Causes, treatment ...

Clinical and Physiological Importance of Platelets. Platelets are a very important component of blood in both physiological and pathological condition which may include the following: Hemophilia: This is a physiological condition characterized by prolong clotting time. This means a little or slight injury or damage to cells, tissue, and organs will lead to profuse bleeding.

Platelets: Definition, Functions and Importance

Circulating blood platelets play a central role in the maintenance of hemostasis. They adhere to subendothelial extracellular matrix proteins that become exposed upon vessel wall damage, which is followed by platelet activation, further platelet recruitment, platelet aggregation and formation of

The clinical significance of platelet microparticle ...

Platelets (thrombocytes) are colorless blood cells that help blood clot. Platelets stop bleeding by clumping and forming plugs in blood vessel injuries. Thrombocytopenia might occur as a result of a bone marrow disorder such as leukemia or an immune system problem. Or it can be a side effect of

taking certain medications.

Thrombocytopenia (low platelet count) - Symptoms and ...

The platelet count may represent a surrogate marker of the severity of organ dysfunction. A low platelet count occurring even early in sepsis patients is indeed recognized as a sign of poor prognostic; however, a single platelet count at admission may have little pertinence , and the kinetics of platelet counts appears to have a deeper meaning. Two alterations of this kinetics have been shown to be of clinical interest in sepsis patients, suggesting that they must be given specific attention.
