Laparoscopic Bariatric Surgery

Bariatric surgeries generally work in two ways – either by limiting the amount of food you can physically put into your stomach, or by intentionally making your small intestine absorb less nutrients. The former is achieved by a gastric bypass, laparoscopic sleeve gastrectomy or laparoscopic gastric banding.

Bariatric Surgery | Laparoscopic.MD

Today, most types of bariatric surgery are performed laparoscopically. A laparoscope is a small, tubular instrument with a camera attached. The laparoscope is inserted through small incisions in the abdomen.

Bariatric surgery - Mayo Clinic - Mayo Clinic

Laparoscopic Gastric Bypass. The "Roux-en-Y gastric bypass" (RYGB) is considered the "gold standard" for weight-loss surgery by the American Society for Metabolic and Bariatric Surgery and the National Institutes of Health. RYGB works by restricting food intake and by decreasing the absorption of food. Food intake is limited by a small pouch that is similar in size to the adjustable gastric band.
