Suicide Risk Assessment And Response
Assessing the risk of suicide in a person expressing suicidal thoughts, or presenting with self-harm or a suicide attempt, is crucial in attempting to prevent deaths. Asking questions about suicidal thoughts does not increase the risk of suicide [9, 17]. There are a number of risk-predicting score systems for determining suicidal intent.

Suicide Risk Assessment and Threats of Suicide | Patient
Clinicians often have to assess and manage suicide risk. Risk assessment is challenging for several reasons, not least because conventional approaches to risk assessment rely on patient self reporting and suicidal patients may wish to conceal their plans. Accurate methods of predicting suicide therefore remain elusive and are actively being studied.
