From a complexity theory perspective then, cities have the following characteristics, and are connected at multiple scales; that is at local community, as well as at a regional, national, and international level. That connection is both internal within each level, but also between the different levels or scales.

URBAN GOVERNANCE: A COMPLEXITY THEORY APPROACH - LSE Cities

We note that the development of collaborative planning theories that see planning as dialogue between conflicting actors is in turn being influenced by conceptions of complexity. In particular, we argue that this shift from static to dynamic, top-down to bottom-up, is problematic for traditional notions of the optimum city which is inevitably an equilibrium to be aspired to.
