It allows for the addition of air conditioning and heating in homes
without ductwork, and with the least amount of disruption to the
interior space. Mini-split systems are made up of two primary

parts, the outside part called a "condenser" (for cooling-only models) or "heat pump" (for heating and cooling models), and the inside part that mounts on an outside wall called an "air handler".

When we talk about a Split System Air Conditioner – most people want to know why it’s called a “Split System”. The answer is simple, the unit is literally split into 2 units. The small cooling head which is mounted indoors for the quiet cooling of the room, along with the larger condenser unit which is located outside – either on the ground or up on a wall and out of eye line.
