Parametric Modeling With Autodesk Fusion

Mikoláš Zuza from Prusa3D recently shared a video tutorial that shows how to use parametric modeling in Fusion 360 to your advantage. In this tutorial, Zuza covers how to quickly and easily change the dimensions of a model without having to correct individual steps. When you change a models paramaters in Fusion 360, you can watch the changes happen in real-time, which is quite handy (and satisfying to watch).

Autodesk Fusion 360: Introduction to Parametric Modeling

Parametric modeling is accomplished by identifying and creating the key features of the design with the aid of computer software. The design variables, described in the sketches as parametric relations, can then be used to quickly modify/update the design. In Autodesk Fusion 360, the parametric part modeling process involves the following steps:

Parametric Modeling with Autodesk Fusion 360

This could include recovering the parametric history from a STEP or IGES file, or even using a 3D scan of a part to build a parametric model. As a first step, we tackled a very narrow version of this problem by attempting to recover the parametric history for simple ‘sketch and extrude’ designs.

Advanced Direct Modeling in T-Splines and Parametric Design. Direct modeling empowers users to fully immerse themselves in an explorative modeling experience, and it can also bypass steps, such as setting planes, sketches, and other 3D commands. While direct modeling is typically associated with T-Splines via the Sculpt environment, it is also possible to use it in parametric settings. This presentation illustrates the power of direct modeling in both environments in Fusion 360 through the ...
