GIA Diamond Grading Report. The GIA Diamond Grading Report includes an assessment of a diamond's 4Cs – color, clarity, cut, and carat weight – along with a plotted diagram of its clarity characteristics and a graphic representation of the diamond's proportions. For standard round brilliant cut diamonds falling in the D-to-Z color range, the report also includes a GIA Cut grade.

GIA Diamond Grading Reports | 4Cs of Diamond Quality by GIA

The GIA scale measures the color grade of diamonds, size, position, and nature of the diamond, as well as the other three C's of diamond grading: carat, clarity, and diamond "cut" grade. There are 11 different grades in the GIA diamond

grading scale.

Diamond Certification: Guide to GIA Diamond Grading

Here's some irony for you: Diamond color, in terms of grading, is determined by the lack of color in a diamond. The less color a diamond has, the higher the color grade. Diamond color subtly distracts the eye from seeing sparkle, so colorless diamonds will appear to sparkle more than yellowish or brownish tinted diamonds.

Grading Diamond Color. Since light source and background can have a significant impact on a diamond’s appearance, diamond color is graded in a standardized viewing environment against color masters. A minimum of two color graders enter their independent evaluations into the system and depending on the agreement of these grades, and the weight and quality of the diamond, it may be sent to additional graders who enter their own color opinions.

Grading the Diamond 4Cs | GIA Diamond Grading & Reports ...

Diamond professionals use the grading system developed by GIA in the 1950s, which established the use of four important factors to describe and

classify diamonds: Clarity, Color, Cut, and Carat Weight. Diamonds can be fashioned into a variety of shapes and still be beautiful. These are known as the 4Cs.
