Stochastic Volatility in Financial Markets: Crossing the ...

For each stock we can thus compute a historical daily volatility as $\sigma(t) = \text{std}[\ln(S(k+1)/S(k))]$, where $\text{std}[\cdot]$ indicates the standard deviation of the argument of the function. Hence, for each stock we have 1011 values of daily volatility. These volatility data have then been analyzed to compute the volatility pdf for each stock.

Volatility in financial markets: stochastic models and ...

In this paper we consider some stochastic volatility models proposed in the financial literature by investigating their ability in modeling statistical properties detected in empirical data. Specifically, we investigate the probability density function (pdf) of historical volatility for 100 highly capitalized stocks traded in the US equity markets.
