Abstract. One characteristic of the service parts planning solution is the tree structure which is defined in the BOD. The implication of this structure is that the demand for the whole network is sourced via external procurement at the entry location (or at the entry locations, if the BOD has multiple entry locations).

Distribution Requirements Planning

| SpringerLink

Distribution Requirements Planning (DRP) Plans and controls the distribution of finished goods based upon demand. In addition, DRP provides centralized control of distribution inventories and creates a coordinated replenishment plan. Master Production Scheduling (MPS) A schedule of items and quantities that a company expects to manufacture.
