Introduction to Petrophysical Analysis for Unconventional Shale Reservoir | Course TRAPSPOT 2020

Field Measurements And Analysis Of

Here, this analysis is based on field measurements, taken during operation on vehicles in a Chongqing subway line, and on numerical simulations. The paper is organized as follows. In Section 2, the field measurements are described and the results are presented.

Field measurements and numerical analysis of the energy

...

The field measurements of the fractured zone caused by blasting at the Äspö underground, where the rock is gray medium-grained diorite, show that the extent of the fractured zone is about 0.8 m thick in the floor and about 0.3 m in the walls [38]. This fractured zone is outlined in Fig. 10.9, which also indicates the charge information.

Field Measurement - an overview | ScienceDirect Topics

Field Measurement 144 Fig 6.5. There is a strong resonance at around 6.2MHz. The return loss remains below 8dB over the frequency range between 6.1MHz to 6.3MHz. The insertion loss was about 35dB around the measured frequencies. The signal source measured here is a high power transmitter (300kW). The E-field component level in some of the 'hot

Field Measurements & Data Analysis. For many coastal projects, the acquisition and analysis of representative data provide the cornerstone upon which a successful outcome is built. At Coastal Frontiers, our field programs are conducted by the same engineers who use the data to solve practical problems. Our capabilities include the measurement and analysis of wind, wave, water level, and current data; the acquisition of bathymetric, side scan sonar, and magnetometer data; and the collection ...

3. Field measurements. The evaluation of surface irrigation at the field level is an important aspect of both management and design. Field measurements are necessary to characterize the irrigation system in terms of its most important parameters, to identify problems in its function, and to develop alternative means for improving the system.

3. Field measurements

Field measurements of the horizontal displacement and strain in the piles, as well as the anchor working load, were collected and analyzed. In addition, a series of two-dimensional finite element method (FEM) analyses combined with a strength reduction technique was conducted to analyze two selected cross sections.

The field measurement analysis is combined with theoretical modelling where the annual energy use of the HFC and CO2 trans-critical refrigeration systems is calculated. Comparing the field measurement and modelling results of COP's for HFC and CO2 systems, the new CO2 systems have higher total COP than HFC systems for outdoor temperatures lower than about 24 C.
