I love the "Ghatti's Tale" series, and this book is an integral part of the series. In book one, we've learned about the "Gleaners", and the dangers that they present. In this book, we're introduced to the "other side", the "Resonants", who are the counterparts of Canteris's Gleaners, and who reside in the neighboring country of "Marchmont".

The first book had a few political points to it, but it was more about finding out "who done it" and why as well as the adventure of tracking down the

villains. I'm disappointed in the behavior of some of the characters. Doyce sometimes seems childish, nowhere near her late 30's, as she is described as being.

The realm of the Canderis is badly shaken when they learn that a neighboring land is home to the Resonants, a race of telepathic men and women who use their mind-altering abilities to transform innocent people into mindless slaves.

The book I have in mind is The Beach at Night, a short illustrated tale for children published in 2007 and translated into English in October of 2016, which focuses on the power of names—and, particularly, on the power one may gain by trying to take control of another’s name. Ferrante’s tale is as intriguing as it is unnerving.

Ultimately, the book doesn't leave the reader with much -- it's more of a concept with a thin thin story than a really engrossing tale. It the kind of material could make an excellent film in the right hands, but it could also make a really horrible film in the wrong ones.

The Ghatti's Tale: Finders Seekers is a masterful blend of action, adventure, mystery and romance. The characters are believable with personality's and intricate back story's. The setting is both fantasy and Sci-fi, being set on another planet but with a medieval atmosphere.
