Methods for eliciting expert opinion to inform health ...

Abstract. Data elicited directly from experts has great potential value for health technology assessment. However, elicitation exercises designed specifically to collect data for decision model parameters are limited. There are a number of important issues to consider when designing such exercises, especially the need to collect complex data (i.e. conditional probabilities) whilst maintaining the comprehensiveness of the exercise for the expert.

Elicitation Of Expert Opinions For Uncertainty And Risks ...

Background. Expert opinion is often sought to complement available information needed to inform model-based economic evaluations in health technology assessments (HTAs). In many cases, experts are invited to provide quantitative judgements on unknown model parameters [1]. In the context of HTA, we define expert elicitation as the process of a subject expert specifying a quantity of interest and associated uncertainty around it, which can be encoded as a probability distribution [2].
