Briggs & Stratton have
two inverter generator
models which have this
capability also: their
2200w and 3000w can
be paired via a Briggs
& Stratton parallel
cable. In this example,
the smaller P2200i
model and the larger
P3000i model can be
paired, however this is
uncommon as the

increase in power is
not hugely beneficial
and therefore the most
popular pairing combo
is two generators of
the same size.

Anyone know anything
about a Craftsman
front tine tiller. It has a
5hp Briggs and
Stratton motor, model

135202, and the tillers model number is 917.295350. It starts up on the first pull but the motor will either be full throttle or die if you idle it down. What do I need to do? I am looking for a owners manual and maybe the date of manufacturing.
