Samsung HTC-550 says "PROT" and shuts off? please help ...

The "PROTECTION" mode is commonly caused by a bad power regulator ic on the amp board. I have repaired many Samsung receivers and dvd players with this issue. Sometimes the regulator is shorted out and sometimes it may output insufficient voltage. In both cases, the protection circuit will kick in.

Samsung PROTECTION?? | AVForums

This protects the amplifier, as ESD currents are routed to the power supplies and bypass capacitors, rather than through the sensitive active circuitry. Abrupt voltage changes across an op amp's input can reverse bias the input differential pair, leading to latent defects, increased input bias current, and increased offset voltage.

Amplifier Input Protection... Friend or Foe? | Analog Devices

An op-amp with a high open loop gain is desirable because the error in the output voltage can be minimized by the high gain. From another point of view, the high open loop gain means that the difference in

the potentials between and the - input
the + input terminal terminal is minimized.
