"Digital Labor". The Internet as Playground and Factory
Digital labor or digital labour is a term for emergent forms of labor in post-Fordist economies, characterized by the production of value through interaction with information and communication technologies. Digital labor takes different forms from on-demand platforms, micro-working and the creation of content for digital platforms such as social media. Digital labor describes affective and social activities within capitalist modes of production not typically recognized as work, including the inc

Digital labor - Wikipedia
The rise of digital labour has come about at a confluence of two trends. First, in much of the world, un- and under-employment is a major social and economic concern for policy-makers, for people with jobs, and for people looking for jobs (ILO, 2015).
