Design Of An Arm Based

Arm Holdings' primary business is selling IP cores, which licensees use to create microcontrollers (MCUs), CPUs, and systems-on-chips based on those cores. The original design manufacturer combines the ARM core with other parts to produce a complete device, typically one that can be built in existing semiconductor fabrication plants (fabs)

at low cost and still deliver substantial performance.

ARM architecture - Wikipedia

Arm architecture specifies a set of rules that dictate how the hardware works when a particular instruction is executed. It is a contract between the hardware and the software, defining how they interact with one another. When software is written to conform with Arm specifications, any Arm-based processor or chipset will execute it in the same way.
