Integrated Pest Management edited by Edward B. Radcliffe

Integrated pest management, also known as integrated pest control is a broad-based approach that integrates practices for economic control of pests. IPM aims to suppress pest populations below the economic injury level. The UN's Food and Agriculture Organization defines IPM as "the careful consideration of all available pest control techniques and subsequent integration of appropriate measures that discourage the development of pest populations and keep pesticides and other interventions to leve

Integrated pest management - Wikipedia

The definition of integrated pest management is multifaceted; it is basically an aggregate of methods used in combating the outbreak of pests and diseases. Integrated pest management programme is a technical approach of controlling pests and diseases using a variety of approaches or methods that eliminate pests from the farm.
