Freedman compares it to the adolescence stage of life that was. The subtitle of "The Big Shift" is "Navigating the New Stage Beyond Midlife". Sounds like this is a self-help or how-to book similar to a lot of the retirement books in vogue these past ten years or so. It is not.

The Big Shift Global campaign. Calling for an end to public financing of fossil fuels and a shift to investing in sustainable, renewable energy to provide energy access for all. The signs of the unfolding climate catastrophe are

increasingly evident, including record-breaking forest fires in the Brazilian Amazon, unprecedented icemelt in the Arctic, devastating flooding in Africa and South Asia, and deadly heat waves in Europe.

The Big Shift Global

The Big Shift is animated by a simple premise: that the challenge of transitioning to and making the most of this new stage -- while deeply personal -- is much more than an individual problem; it's an urgent social imperative, one affecting all generations. By embracing this time as a unique period of life - - and providing guidance, training, education and support to the millions who are

in it -- Freedman says that we can make a monument out of what so many think of as the leftover years.

In *The Big Shift*, Freedman bemoans the fact that the discussion about longer lives in America has been entirely about the staggering economic costs of a dramatically aging society when, in reality, most of the nation's 78 million boomers are not getting old — at least not yet. The whole 60- to 80-year-old period is simply new territory, he writes, and the people in this period constitute a whole new phenomenon in the 21st century.
