The wavelength of a wave is the distance from a point on one wave to the same point on the next wave. Usually this is measured from the top of one wave to the top of the next wave Wavelength is usually measured in metres (a distance) The amplitude of a wave is its height, measured from the middle of the wave to its top (or from the middle to its bottom)

Waves | CIE IGCSE Physics Revision Notes

Impressively broad in scope, Physics of Waves offers a novel approach to the study of classical wave theory — a wide-ranging but thorough survey of an important discipline that pervades much of contemporary physics. The simplicity, breadth, and brevity of the book make it ideal as a classroom text or as a vehicle for self-study.
