Slip ring - Wikipedia

Slip rings are used in rotating electrical assemblies to make a continuous electrical connection between stationary and moving conductors. This enables the stationary

power source to transmit electrical power to the rotating component. Basically, a slip ring is a band of electrically conductive material mounted on a shaft.

Purpose of Slip Rings in an Alternator | Electrical Concepts

A Slip Ring Unit is an electromechanical device which allows the transmission of power and electrical signals from a stationary to a rotating structure. Slip Rings can be used in any electromechanical system which requires unrestrained, intermittent or continuous rotation while transmitting power and/or data.
