Composite failure analysis and fractography is a growing discipline and

has proved to be invaluable for studying fibre reinforced polymer composites. By interpreting the fracture surface morphology, the source and sequence of fracture can be determined.

Failure Analysis & Fractography of Composite s

Fractography is a method in failure analysis for studying the fracture surface of materials. Studying the characteristics of the fractured surface can help to determine the cause of failure in an engineered product. Different modes of failure produce characteristic features on the surface, allowing a forensic analysis to determine the root cause of the failure.

Fractography is critical to failure analysis of metals and plastics. Fractography of plastics is a relatively new field with many similarities to metals. Utilizing case histories, various aspects of failure analysis and fractography are compared and contrasted. Common failure modes

include ductile overload, brittle fracture, impact and fatigue.

FRACTOGRAPHY OF METALS AND PLASTICS

Fractography is the study of the fracture surfaces of materials. Fractographic methods are routinely used to determine the cause of failure in engineering structures, especially in product failure and the practice of forensic engineering or failure analysis. In material science research, fractography is used to develop and evaluate theoretical models of crack growth behavior. One of the aims of fractographic examination is to determine the cause of failure by studying the characteristics of a fr
