Play Framework Essentials - bitofnews.com

Play Framework is an open-source web application framework which follows the model-view-controller architectural pattern. It is written in Scala and usable from other programming languages that are compiled to JVM Bytecode, e.g. Java. It aims to optimize developer productivity by using convention over configuration, hot code reloading and display of errors in the browser. Support for the Scala programming language has been available since version 1.1 of the framework. In version 2.0, the ...
